

The Stressless logo is a dark blue, teardrop-shaped graphic containing the word "Stressless" in a white, elegant serif font.

Stressless®

A photograph of a modern interior setting. In the foreground, a round, dark wood table with a thick, cylindrical pedestal and a circular base is surrounded by four chairs with a textured, reddish-brown fabric upholstery. The table is set with two black mugs, a small black vase with green leaves, and two plates of pastries. In the background, there are more chairs, a wall-mounted TV, and large windows with a view of a snowy landscape. The floor is made of light-colored wood.

Stressless® Basil  
with 3D knitted upholstery cover

# Sustainable, versatile and beautiful

Ekornes is proud to introduce 3D knitting technology, a revolutionary technique used to create the upholstery for the Stressless® Basil dining chair. This innovative process allows for immaculate precision and meets excellent technical requirements, resulting in a chair that is both beautiful and functional. Wool is a modern trend that fits in equally well in your home or in commercial settings.

### Repair, refurbish, recycle

Circular design is a design approach that aims to minimize waste and maximize the lifespan of products. At Ekornes, we believe that circular design is not only good for the environment, but also for our customers. By designing products that can be easily repaired, refurbished, or recycled, we can reduce the amount of waste that ends up in landfills and prolong the lifespan of our products. This not only reduces our environmental impact, but also helps us to create more sustainable and responsible products that our customers can enjoy for years to come.

### Not a thread to waste

3D knitting minimises waste of materials as it is knitted with superior precision, minimising the use of materials. Furthermore, utilising certified washable wool yarn in combination with biodegradable polyamide emphasises that the production process and everyday use is more environmentally friendly.

### Certified for the future

The Stressless® Basil dining chair not only looks good but also meets high standards for sustainability. The Nativa label validates that the wool's origin can be traced all the way back to the wool farmers, and that animal welfare is accounted for. Additionally, the yarn holds certifications in accordance with both BlueSign and Oeko-Tex standards. These certifications not only highlights the yarn's quality but also emphasises its commitment to environmentally-friendly and socially responsible production practices.

# Superior fit

The yarn in the Stressless® Basil upholstery is made from 80 % wool and 20 % biodegradable polyamide. The wool yarn is made washable with an approved chlorine free process, making sure functionality is in focus.

The wool in the knitted upholstery fabric provide excellent elasticity, stretch and fit. This contributes to increased sitting comfort, helps the upholstery to keep its shape and accentuates the design of the furniture. The elasticity of the upholstery also makes it easier to remove for cleaning.

The knitting technology used ensures that we get a hard-wearing upholstery with excellent performance. Furthermore, the knitting technology ensures perfect pattern matching in the joins – an exclusive detail that could otherwise only be achieved by custom-making each cover. All designs are 3D knitted in yarn dyed wool.

# Replaceable and washable

Spills happen – whether it's your dinner or your drink, accidents can damage your pristine cover. With the Stressless® Basil dining chair, you can rest assured that your furniture can handle whatever life throws at it.

Featuring replaceable and washable upholstery means you can enjoy your meals without being overly cautious about spillages. The upholstery cover can be removed and washed on a 30° wool programme.

You can also redesign the chair by ordering a new cover in a vast variety of colours.

**Balance&Glide.** Our dining chairs have a flexible seat and back, offering a variety of positions for increased comfort. This comfort enables you to maximize your quality time with friends and family.

## A unique chair

Long hours can put a strain on your body. Your natural response is to shift positions. Stressless® chairs work with the body. With a flexible seat and back, they follow your body's movements in a unique way, and offer a variety of positions for increased comfort.

The Stressless® chairs come in a wide variety of designs and functional bases. With reclining back, replaceable base, seat and back cushions Stressless® chairs are perfect for restaurants, guest rooms, meeting rooms, or as a desk chair.

Choose a Stressless® chair with the unique Balance&Glide™-system.

# Choose design, legs and upholstery on your dining chair

## Select design and size

Here you can choose between two back heights and two seat sizes, with or without armrests on the largest model.

## Select upholstery in fabric

The chairs can be delivered in a vast variety of colours.

## Select legs in wood or metal

There are nine legs to choose from in a variety of wood and metal finishes.

Available in two colours.

**K06 Mirage** is a 80% wool and 20% biodegradable polyamide fabric knitted with a two-tone weave which gives a modern look. The yarn is certified according to BlueSign and Oeko-Tex.

**K03 Leaf** is a 80% wool and 20% biodegradable polyamide textile, knitted in a herringbone pattern in soft neutral colours. The yarn is certified according to BlueSign and Oeko-Tex.

### Care and cleaning

To keep the surface clean, we recommend regular vacuuming on medium power. The surface should be wiped with a damp cloth when needed. Any dirt or spills should be removed immediately. If there are any stains or dirt that cannot be removed with a damp cloth, the upholstery can be removed and washed on a 30° wool programme using a mild, neutral detergent for wool. Keep in mind that pilling is natural on natural fibre products and can easily be removed by vacuuming or by hand.
